Employment

Microsoft, *Software Engineering Intern*

Jan – Apr 2016

- Joined the Azure AD ‘Gateway’ team: a reverse-proxy guarding all AD identity services, e.g. Office 365.
- Shipped a complete health/functionality monitoring solution with comprehensive runners, metrics, dashboards, alerts and logs for a critical distributed web service—ensuring high availability/reliability.

Sharbud, *Software Developer*

Feb – Apr 2016

- Contracted for urgent work with friend’s startup building “Uber for everyday items” to secure funding.
- Wrote a Stripe delayed-payments API and real-time user chat using ASP.NET and Entity framework.

Microsoft, *Program Manager Intern*

May – Aug 2015

- Spearheaded the investigation/mitigation of categories of 3rd-party post-rel regressions from Windows Updates that hurt 10’s of millions of users, cost \$millions, and ruin Microsoft PR in the news/media.

Connected Lab, *Software Engineering Intern*

Aug – Dec 2014

- Began on Day 1 of hyper-growth IoT solutions startup with amazing culture, vision and mentors.
- Launched their first client’s project (<http://snypr.com>): a sports-training app backed by Eric Schmidt’s venture fund. Full-stack iOS: from CRUD/interactive navigation, to infinite-paging leaderboards.
- Crafted webpage prototype that won Union Station’s grand reopening \$1M+ project out of 40+ RFPs.

Epson, *Software Engineering Intern*

Jan – May 2014

- Joined a research team solving the extremely difficult problem of using 3D computer vision to identify deformable objects. Wrote an image-comparison tool reducing evaluation time of test results by 3x.

InfoMax Technologies, *Android Developer Intern*

May – Aug 2013

- Built next-gen prototype of a paperless upgrade to current forms and digi-pen data-capture product.

Education

Software Engineering (BSE), *University of Waterloo*

Graduating April 2017

- Data Structures/Algorithms, Networks (TCP/IP), Computer Architecture, Security, AI/Machine Learning

Activities and Projects

SAT Solver on GPU, *Software Researcher*

Apr 2016 – Present

- 4th-year project: collaborating with PhD student and prof to parallelize satisfiability solver using GPUs.

Startup Weekend Toronto, *Software Developer*

Nov 21–23, 2014

- Annual international startup hackathon sponsored by: Google for Entrepreneurs and Amazon.
- Built indoor traffic monitoring system in one weekend. Triangulated 140+ smartphone RSSI’s displayed in D3.js floorplan heat map hosted on AWS. Ranked in top 5, receiving praises from judges.

UW Chinese Christian Fellowship, *Chair*

2014 – Present

- Leading the committee to organize weekly gatherings, retreats, and special events for 120+ members.

Prayer Box, *Android Developer and UI/UX Designer*

2013 – 2014

- Created our fellowship’s first mobile prayer request sharing app with a friend: 60+ regular users.
